Updated CDC Guidance Regarding Zika Virus

The Centers for Disease Control and Prevention (CDC) has released *Update: Interim Guidelines for Health Care Providers Caring for Infants and Children with Possible Zika Virus Infection — United States, February 2016* as a Morbidity Mortality Weekly Report Early Release. These updated guidelines contain a new recommendation for routine care for infants born to mothers who traveled to or resided in areas with Zika virus transmission during pregnancy but did not receive Zika virus testing, when the infant has a normal head circumference, normal prenatal and postnatal ultrasounds (if performed), and normal physical examination. New guidelines have also been established for testing of children up to 18 years of age. The recommendations for pregnant women remain unchanged.

This report can be found at:

http://www.cdc.gov/mmwr/volumes/65/wr/mm6507e1er.htm?s_cid=mm6507e1er_e

DHEC will provide consultation to health care providers and facilitate testing for Zika virus infection. Health care providers should contact their regional DHEC Public Health Department for assistance with testing and to report suspected Zika virus disease cases.

DHEC contact information for reportable diseases and reporting requirements

Reporting of **Zika virus** is consistent with South Carolina Law requiring the reporting of diseases and conditions to your state or local public health department. (State Law # 44-29-10 and Regulation # 61-20) as per the DHEC 2016 List of Reportable Conditions available at:

<http://www.scdhec.gov/Library/CR-009025.pdf>

Federal HIPAA legislation allows disclosure of protected health information, without consent of the individual, to public health authorities to collect and receive such

information for the purpose of preventing or controlling disease. (HIPAA 45 CFR §164.512).
