Tanned skin is
damaged skin.
CAN
the
TAN

CAN *the* TAN

...literally

- Tanned skin is damaged skin.
- Tanning in tanning beds increases the risk of all forms of skin cancer, which can lead to scarring.
- Tanning causes up to 90% of visible signs of aging like wrinkles, blotchiness, dark spots, saggy skin, and leathery texture.
- Sunless self-tanning products are a safe way to look tan.
