● including total disturbed area, name of and distance to nearest waterbody, and onsite non-jurisdictional wetland impacts and acreage.

The mine will have a General Mine Operating Permit that limits the total disturbed area to 5 acres. The pit area will be approximately 4.6 acres with constructed haul road 0.4 acre. Maximum depth of mining is 20 feet with no processing plant. Pit will be dewatered due to high water table. Water from the pit sump will be decanted using a floating pump intake and discharged from the site if necessary. Any discharged water through outfall 001 into Maple Swamp and will be sampled as required by the SCG73000 NPDES General Permit.

The property was delineated for jurisdictional wetlands by The Brigman Company. Mining related disturbances and haul road will avoid the wetlands and maintain a 50-foot upland buffer from delineated wetlands.

Attached is the application to the Corps of Engineers requesting a jurisdictional determination.

All applicable Project Policy Checklist(s) that apply to the proposed project must be submitted with this request form. (See [www.scdhec.gov/environment/ocrm/czc](http://www.scdhec.gov/environment/ocrm/czc) for available Policy Checklists)
