R. 61-55. SEPTIC TANK SITE EVALUATION FEES

SECTION I. PURPOSE

A major factor influencing the health of individuals where public sewer is not available is the proper treatment and disposal of human excreta and other domestic wastes. To this end and to protect the environment from contamination by untreated sewage, the Department of Health and Environmental Control has established and maintained a conscientious program of designing individual sewage treatment and disposal systems, evaluating sites for suitability for individual sewage treatment and disposal systems and approving the installations of such systems. This direct service program is conducted primarily by public health professionals working in county health departments. Funding for the program comes from state appropriations and the fees authorized by this regulation.

The following definitions shall apply in the interpretation and enforcement of this regulation.

- B. HEALTH AUTHORITY - An authorized representative of the South Carolina Department of Health and Environmental Control.
- C. INDIVIDUAL SEWAGE TREATMENT AND DISPOSAL SYSTEM - A system designed for the treatment and disposal of sewage by a septic tank and soil absorption trench. The term also includes alternatives to septic tanks and soil absorption trenches when such alternatives are approved by the Health Authority under the provisions of *R.61-56, Individual Sewage Treatment and Disposal Systems*.
- D. PERMIT - A written statement issued by the Health Authority permitting the construction of an individual sewage treatment and disposal system under the provisions of *R.61-56, Individual Sewage Treatment and Disposal Systems*.
