

PUBLIC NOTICE

Notice #00407-1
September 21, 2017

This notice is to inform the public that the South Carolina Department of Health and Environmental Control (DHEC) is accepting public comments on the Corrective Action Plan (CAP) that addresses the cleanup of groundwater contamination at the location listed below. The contamination originated from two underground heating oil tanks. The quantity of the release discovered December 1973 is estimated to be 38,000 gallons. To date, approximately 10,000 gallons of heating oil have been recovered.

FACILITY: Stanley Tools Cheraw Plant, 100 Stanley Rd., Cheraw, SC

APPLICANT: Ms. Kathryn Hinckley, Stanley Black and Decker, 1000 Stanley Dr., New Britain, CT 06053

SUMMARY OF CAP: AECOM, an environmental consulting firm, has submitted a CAP that proposes the use of active skimmers to address groundwater contamination on behalf of Stanley Tools Cheraw Plant. The skimmers will be placed in recovery wells at the site; light non-aqueous phase liquid / petroleum will enter the skimmers, via the wells and will be pumped out of the wells. Petroleum and petroleum by-products naturally break down over time through chemical, physical, and biological processes. These processes are called natural attenuation.

PUBLIC COMMENT PERIOD: The deadline for submitting written comments is **five (5) PM October 23, 2017**. Any interested person(s) may submit written comments concerning the cleanup to the Project Manager listed below. Please feel free to bring this notice to the attention of persons whom may be interested in this matter. If there is a significant degree of public interest, DHEC will hold a public meeting.
