 Children and Youth with Special Health Care Needs
 Appendix 7
 Orthotic and Prosthetic Services

Coverage for financial assistance programs includes orthotic or prosthetic devices when need is directly related to qualifying medical condition. These items fall within the "E" and "L" CPT codes included on the listed of covered DME items in the CSHCN Policy Manual. Authorization for purchase of orthotic and prosthetic devices is limited to providers with valid purchase orders on file with DHEC. Current providers are listed below.

When eligible children need orthotic or prosthetic devices:

1. Identify the vendor on the list below that can serve the family most conveniently;
2. Confirm that the item needed is covered;
3. Contact the provider to confirm that the requested item is in stock or can be ordered; and
4. Issue authorization for purchase of the item(s) according to established policy.

The reimbursement amount is based on the purchase order in effect on the date of services. Providers will be reimbursed the amount associated with these purchase orders.
