

Antiretrovirals

Nucleoside/Nucleotide Reverse Transcriptase Inhibitors

abacavir	Ziagen **
abacavir + lamivudine	Epzicom **
abacavir + lamivudine + zidovudine	Trizivir **
didanosine	Videx, Videx EC
emtricitabine	Emtriva
emtricitabine + tenofovir	Truvada
lamivudine	Epivir
lamivudine + zidovudine	Combivir
stavudine	Zerit
tenofovir	Viread
zidovudine	Retrovir

Non-Nucleoside Reverse Transcriptase Inhibitors

delavirdine	Rescriptor
efavirenz	Sustiva
etravirine	Intelence
nevirapine	Viramune, Viramune XR
rilpivirine	Edurant

Protease Inhibitors (PI)

atazanavir	Reyataz
atazanavir+cobistat	Evotaz
darunavir	Prezista
darunavir + cobistat	Prezcobix
fosamprenavir	Lexiva
indinavir	Crixivan
lopinavir + ritonavir	Kaletra
nelfinavir	Viracept
saquinavir	Invirase
tipranavir	Aptivus

Fusion Inhibitor

enfuvirtide	Fuzeon *
-------------	----------

Entry Inhibitor - CCR5 Co-Receptor Antagonist

maraviroc	Selzentry *
-----------	-------------

Integrase Inhibitors

dolutegravir	Tivicay
elvitegravir	Vitekta *
raltegravir	Isentress

Pharmacokinetic Boosters

cobicistat <i>(see additional information)</i>	Tybost
ritonavir	Norvir

* Prior authorization is required. Refer to prior authorization instructions in next column.

** Abacavir and abacavir-containing medications are not subject to prior authorization; however, refer to the product's full prescribing information before adding abacavir or an abacavir-containing medication to a patient's drug regimen.

Antiretrovirals

Multi-Drug Combination Agents

efavirenz, emtricitabine, and tenofovir disoproxil fumarate	Atripla
emtricitabine, rilpivirine, and tenofovir disoproxil fumarate <i>(see additional information section)</i>	Complera
emtricitabine and tenofovir alafenamide	Descovy
elvitegravir, cobicistat, emtricitabine, and tenofovir alafenamide	Genvoya
emtricitabine, rilpivirine, and tenofovir alafenamide fumarate <i>(see additional information section)</i>	Odefsey
elvitegravir, cobicistat, emtricitabine, and tenofovir disoproxil fumarate	Stribild
abacavir, dolutegravir, and lamivudine	Triumeq **

Opportunistic Infection Protection/Treatment

acyclovir	Zovirax
atovaquone	Mepron
azithromycin	Zithromax
ciprofloxacin, oral	Cipro
clarithromycin	Biaxin
clindamycin	Cleocin
dapsone	Dapsone
ethambutol	Myambutol
famciclovir	Famvir
fluconazole	Diflucan
itraconazole	Sporanox

(Listing continues on next page)

*** Prior Authorization Instructions**

Prior authorization is required for an individual's first ADAP prescription for:

* *Fuzeon (enfuvirtide)*

* *Selzentry (maraviroc)*

* *Vitekta (elvitegravir)*

To obtain the PA form, click on "Prior Authorizations" at:

<https://www.pantherspecialty.com/sc-adap/>

The physician should complete the prior authorization request form and then fax the form along with accompanying documentation to 412-787-9400 (fax). After approval of an ADAP client's initial prescription for a drug requiring prior authorization, it is not necessary to submit an additional prior authorization request to ADAP for that drug for that individual.

Opportunistic Infection Protection/Treatment (continued)

leucovorin	Leucovorin
prednisone, oral	Prednisone
ribavirin	Ribavirin
rifabutin	Mycobutin
sulfadiazine	Sulfadiazine
sulfamethoxazole/trimethoprim	Bactrim DS, Bactrim
trimethoprim	Trimethoprim
valacyclovir	Valtrex
valganciclovir	Valcyte

Other Drugs - Antidepressants

amitriptyline	Amitriptyline
bupropion	Wellbutrin
citalopram	Celexa
duloxetine	Cymbalta
escitalopram	Lexapro
fluoxetine, daily formulation	Prozac
mirtazapine	Remeron
paroxetine	Paxil
sertraline	Zoloft
trazodone	Trazodone
venlafaxine	Effexor

Other Drugs - Antilipidemics

pravastatin	Pravachol
rosuvastatin	Crestor
simvastatin	Zocor

ADAP Drug Coverage Guidance

A prescription is required for any ADAP formulary drug, regardless of whether the product is legend or OTC.

Quantity of Drug

One-month supplies of ADAP formulary drugs, as authorized by the prescriber, are dispensed.

Generic Drugs

Generic formulations of ADAP formulary drugs are dispensed when determined as most cost-effective.

Additional Information

- 1) Descovy - added to formulary June 2016.
- 2) Odefsey - added to formulary April 2016. Odefsey is indicated as a complete regimen for the treatment of HIV-1 infection in patients with no antiretroviral treatment history and HIV-1 RNA levels less than or equal to 100,000 copies/mL.
- 3) Doxycycline hyclate and doxycycline monohydrate - April 2016 clarification: both forms of doxycycline are covered formulary drugs.
- 4) Genvoya - added to formulary December 2015.
- 5) Tybost - should not be used with products such as Evtaz, Prezcoibx, or Stribild; cobicistat is a component of these products. Tybost in combination with lopinavir/ritonavir or regimens containing ritonavir is not recommended due to similar effects of Tybost and ritonavir on CYP3A. Refer to the full prescribing information: http://www.gilead.com/~media/Files/pdfs/medicines/hiv/tybost/tybost_pi.pdf
- 6) Complera - indicated for use as a complete regimen for the treatment of HIV-1 infection in patients with no antiretroviral treatment history and with HIV-1 RNA less than or equal to 100,000 copies/mL at the start of therapy.

Other Drugs - Miscellaneous

amoxicillin	Amoxicillin
amoxicillin-clavulanate	Augmentin
clotrimazole	Clotrimazole
clotrimazole/betamethasone cream	
doxycycline hyclate	Vibramycin
doxycycline monohydrate	Monodox
gabapentin	Neurontin
ketoconazole tablets, cream	Ketoconazole
levofloxacin, oral	Levaquin
metronidazole, oral	Flagyl
moxifloxacin, oral	Avelox
nystatin	Nystatin
nystatin-triamcinolone cream, ointment	
ondansetron tabs	Zofran, Zofran ODT
oseltamivir	Tamiflu
promethazine	Promethazine
voriconazole, oral	Vfend
zanamivir	Relenza

Other Drugs - Smoking Cessation

bupropion SR tablet	Zyban
nicotine inhaler, spray	Nicotrol
nicotine patch	NicoDerm CQ
nicotine polacrilex gum, lozenge	Nicorette
varenicline tablet	Chantix
