## Introduction

This is the tenth volume in a series of teen pregnancy data books produced by the South Carolina Department of Health and Environmental Control (SCDHEC). Teen pregnancy events in the lives of South Carolina residents over the past decade are documented in this current volume.

Since 1994, SC teen pregnancy data has been presented for four commonly requested age groups of adolescents: 10-19, 10-14, 15-17, 18-19 and the traditional 14-17.

The Office of Public Health Statistics and Information Services (PHSIS) collects data on pregnancy events (live births, abortions and fetal deaths). South Carolina law requires this data to be reported to SCDHEC; therefore the statistics presented should be representative of live births, abortions, and fetal deaths that occur among SC residents.

In this report, estimated pregnancies are defined as the number of live births plus the number of abortions plus the number of fetal deaths.

Estimated pregnancies = live births + abortions + fetal deaths

Fetal deaths are defined as fetal deaths that meet the criteria of 20<sup>+</sup> weeks gestation (length of pregnancy) and/or fetal weight of 350<sup>+</sup> grams.

Fetal death → 20<sup>+</sup> weeks gestation and/or

Fetal death → fetal weight of 350<sup>+</sup> grams

The Office of Research and Statistical Services (ORSS) provide population estimates. These estimates are computed from information available to ORSS; intercensal population (1988-1989, 91-99, 2001-2002) should be recognized as estimates. The 1990 and 2000 population is directly from census data. Rates published in this volume may differ from previous reports due to revised population estimates.

## Table of Contents

<b>Introduction</b>		<b>i</b>
<b>Section I</b>	<b>Ages 10-14 By County of Residence By Race</b>	<b>1</b>
<b>Section II</b>	<b>Ages 14-17 By County of Residence By Race</b>	<b>48</b>
<b>Section III</b>	<b>Ages 15-17 By County of Residence By Race</b>	<b>95</b>
<b>Section IV</b>	<b>Ages 18-19 By County of Residence By Race</b>	<b>142</b>
<b>Section V</b>	<b>Ages 10-19 By County of Residence By Race</b>	<b>189</b>
<b>Section VI</b>	<b>Technical Notes</b>	<b>236</b>

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Beginning in 1983, abortion statistics contain out-of-state (O-O-S) abortions

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 10-14

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Beginning in 1983, abortion statistics contain out-of-state (O-O-S) abortions

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 10-14

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 14-17

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 14-17

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 14-17

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried Mothers, Percentage represents percent of all live births to unmarried females age 15-17

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population

Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population

Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population  
 Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

<sup>1</sup> Estimated pregnancies equal total live births plus abortions plus fetal deaths

<sup>2</sup> Abortion statistics contain out-of-state (O-O-S) abortions.

<sup>3</sup> Estimated Pregnancies, Live Births and Abortions: Rates calculated per 1,000 population

Fetal deaths: Rates calculated per 1,000 live births plus fetal deaths

<sup>4</sup> Live Births to Unmarried mothers-Percentage represents percent of all live births to unmarried females age 18-19

\* Race may not sum to total due to unknown races.

# TECHNICAL NOTES

---

SECTION

VI

## Definition of Terms

**Abortion**: Purposeful termination of pregnancy with intention other than to produce a live born infant or to remove a dead fetus.

**Age of Mother**: The age of the mother in years at her last birthday.

**Estimated Pregnancy**: The number of live births plus the number of abortions plus the number of fetal deaths.

**Fetal Deaths**: Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction, the fetus does not breath or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles. A fetal death is required to be reported if the fetus has completed the twentieth week or more of gestation or weighs 350 grams or more. **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

**Live Birth**: The complete expulsion or extraction of a product of human conception from its mother, irrespective of the duration of pregnancy, which after such expulsion or extraction, breaths or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

**Marital Status**:

**Unmarried**: a woman who has never been married or who has been widowed or legally divorced in excess of 280 days.

**Married**: A woman who is married or has been married within 280 days from conception.

**Paternity Acknowledgement**: gives authorization to list the name of the father by means of an affidavit as required by South Carolina Law, Section 44-63-165. For statistical purposes, paternity acknowledgements are included in the married category.

**Residence Data**: Data allocated to the place in South Carolina where the person normally resides, regardless of where the event occurred.

## Interpretation of Data

**Rate Calculations With Small Numbers:** There are variations in all statistics, which are the result of chance. This characteristic is of particular importance in classifications with small numbers of events where small variations are proportionately large in relation to the base figure.

**Race:** Information on race of the mother and father is reported on birth and fetal death certificates, and the race of the woman is reported on the abortion form. For statistical purposes, the tables in this report are based on the classification of "White" and "Black and Other". Blacks currently make up 95.8 percent of Black and Other Population of South Carolina. To be consistent with National Center for Health Statistics and with other states, the Office of Public Health Statistics and Information Services of the South Carolina Department of Health and Environmental Control began utilizing the race of the mother for births in 1990. Abortions and fetal deaths are characterized by the race of the woman for all reported years.

**Fetal Death Rates:** Beginning in 1993, the fetal death rate calculations were changed to the formula recommended by NCHS, which includes fetal deaths plus live births in the denominator. Due to this change, the rates reported in this series will not be identical or comparable to rates reported in previous volumes.

**POPULATION DATA:** South Carolina population estimates for 2002 were available from the National Center for Health Statistics (NCHS) for the state as a whole and for each county by age, race, and gender. In order to provide rates for vital records data by single race category, NCHS developed a 'bridging' methodology, which regrouped the population of the Census, designated 'multiple race' categories into single race categories. The 2000 Census was the first nationwide implementation of revised standards requiring federal agencies to offer individuals the opportunity to select one or more races. NCHS's population estimates by age and gender category are consistent with corresponding population data provided to the Office of Research and Statistics, South Carolina Budget and Control Board by the US Census Bureau for the state as a whole and for each county. For age groups of 14-17, 15-17, and 18-19 years, it is assumed that the population within the five-year age groups of 10-14 and 15-19 is distributed uniformly throughout these age intervals.

## Formulae

### Estimated Pregnancy Rates

$$\frac{\text{Number of pregnancies (specific age group)}}{\text{Total population of girls (specific age group)}} \times 1000$$

### Live Birth Rate

$$\frac{\text{Number of live births (specific age group)}}{\text{Total population of girls (specific age group)}} \times 1000$$

### Abortion Rates

$$\frac{\text{Number of abortions (specific age group)}}{\text{Total population of girls (specific age group)}} \times 1000$$

### Fetal Death Rates

$$\frac{\text{Number of fetal deaths (specific age groups)}}{\text{Total number of live births plus number of fetal deaths (specific age group)}} \times 1000$$

### Percent of Births to Unmarried Girls

$$\frac{\text{Number of live births to unmarried girls (specific age group)}}{\text{Total number of live births to girls (specific age group)}} \times 100$$
