

Diabetes In Hampton County, 2012

Produced by the South Carolina Department of Health and Environmental Control

Impact of Diabetes in the United States

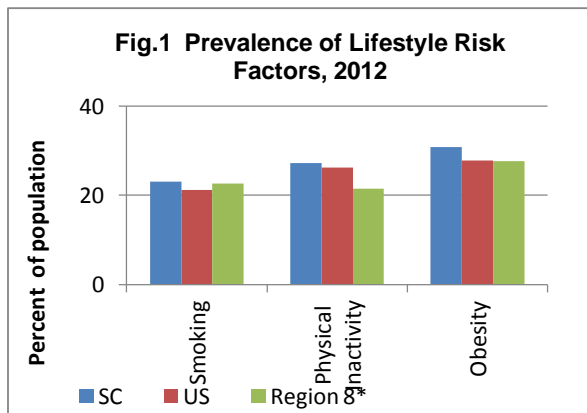

- Diabetes affects 25.8 million Americans and contributes to approximately 231,000 deaths a year.
- Diabetes is becoming more common in the United States. From 1980 through 2011, the number of Americans with diagnosed diabetes has more than tripled (from 5.6 million to 20.9 million).
- The direct and indirect costs of diabetes in the U.S. were nearly \$174 billion in 2008.
- 69,701 people died of diabetes in the U.S. in 2010.

Diabetes in South Carolina

- Approximately 421,549 adults in South Carolina are diagnosed with diabetes. African Americans have a 42% higher prevalence than Whites.
- The total direct costs of hospitalizations and emergency room visits were over \$4.7 billion in 2012.
- Diabetes is the seventh leading cause of death in South Carolina, claiming 1,186 lives in 2012.

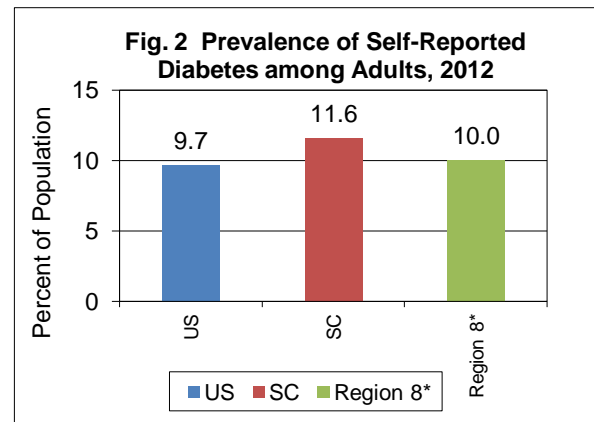

Behavioral Risk Factors

- Major behavioral risk factors, such as obesity and physical inactivity are partially responsible for development of type 2 diabetes (Fig 1).

Diabetes Prevalence

- An estimated 10% of adults in Region 8 suffer annually from diabetes (Fig 2).

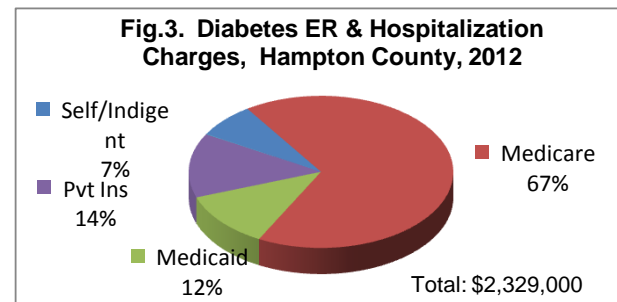

*County-level BRFSS not available for 2012.

Hospital and Emergency Room Discharges

- In 2012, there were 73 hospitalizations for diabetes in Hampton County for all ages.
- There were an additional 684 hospital discharges with diabetes-related conditions in Hampton County.
- In 2012, there were 154 emergency room (ER) visits for diabetes as the primary diagnosis, among which 111 (72%) were by African-American patients.

- There were 1252 ER visits for diabetes as a related condition.

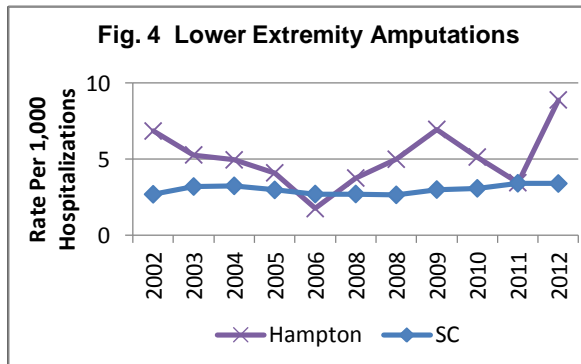

- Medicare paid for 67% of ER and Hospitalization charges in Hampton County (Fig 3).

Complications

- 43% of patients hospitalized in SC for diabetes had complications in 2012; 50% of hospitalizations in Hampton County (Table 1).
- In 2011, more than 74% of people in SC with diabetes had hypertension, compared with only 30% of people without diabetes.

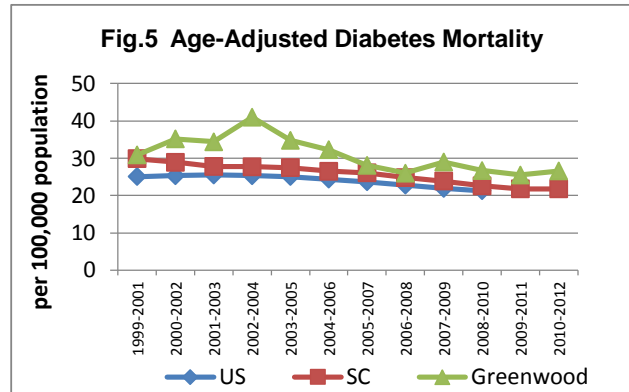

Diabetes Complication	Hospital Admissions	Percent of Diabetes Hospital Admissions	Total Charges
Renal Failure	292	40%	\$9,380,900
Lower Extremity Amputation	25	3%	\$1,451,300
Ketoacidosis	20	3%	\$397,000
Retinopathy	30	4%	\$1,164,700

- In 2011, more than 67% of people with diabetes had high cholesterol.
- 2012, the rates for lower extremity amputations among blacks in SC were 3times the rates among whites.

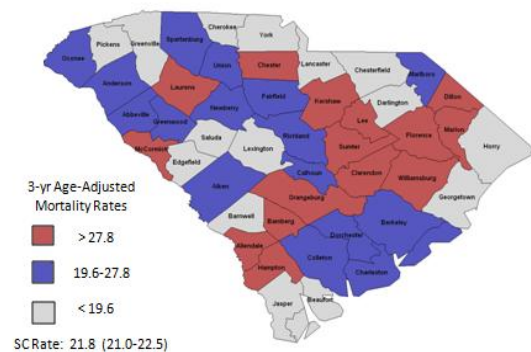

Mortality

- Diabetes is the seventh leading cause of death in Hampton County.
- A total of 9 people in Hampton County died from diabetes in 2012.

- The Hampton County mortality rate was 36.6/100,000 in 2012, above the state average.
- Hampton County ranks #3 in diabetes mortality in South Carolina 2010-2012.
