2016 Confirmed Travel-Related Zika Cases in South Carolina*
Total cases = 59 (Map reflects total number of Zika cases from April 29 to December 31, 2016).

Footnote:
* Data may not reflect the risk of Zika infection to residents in a county.
* Counties with more travelers overall are more likely to have travelers with confirmed Zika infection.
* Zika virus has not been detected in South Carolina mosquitoes as of the date this map was published.
* Data displayed is preliminary and is subject to change as more information is received.
