

**Oct. 19, 2015:**

DHEC teams are currently assessing Class One and Class Two dams statewide as a precaution after the historic rains and flooding. Since the beginning of the incident period, we've assessed 578 dams statewide so far. As part of this proactive assessment, the agency has:

- Confirmed that 31 regulated, 1 federal and 4 unregulated dams have breached.
- Issued [emergency orders](#) covering 75 dams

**There is no immediate risk to public safety at this time.**

The dam status list will continue to be updated on our website as DHEC field teams complete these assessments.
