

15 DAY MOVE MORE PHYSICAL ACTIVITY CALENDAR

Learning Objective:

Students will learn ways to be engaged in physical activity each day.

Materials Required:

Physical Activity Calendar and Chart

Estimated Time Required:

10-15 minutes per day

Teaching Instructions:

- 1: Did you know that students who are physically active also perform better academically? Ask your class if they want to do their best in school. If so, they need to be physically active everyday.
- 2: Explain to students that being physically active is just as important as eating right to live a long and healthy life. Experts recommend that Americans aim for **60 MINUTES** of physical activity **EVERY DAY**.
- 3: Pick a date to start your 15-Day Physical Activity Chart
- 4: Fill out the blank calendar with the date, name of activity, and length of time the class spend doing the activity. Use the example exercises on the 15-Day Calendar as a guide, incorporate different exercises with them, or make up your own!
- 5: Have fun being physically active together, and watch their test scores soar!
