Re: Associated Asphalt Columbia, LLC t/a Seaco Emulsions  
Request for Coverage under the Registration Permit for Fuel Combustion Operations  
for Facility Covered by Existing Permit Number 1900-0220

Dear Ms. Hayes:

Enclosed you will find an executed Request for Coverage under the Registration Permit for Fuel Combustion Operations for the above-referenced facility permitted under existing Permit Number 1900-0220.

Please confirm receipt of the enclosed Request for Coverage form at your earliest opportunity. Should you have any questions concerning the enclosed document, please do not hesitate to contact me. We appreciate your assistance in this matter and look forward to hearing from you.

Very truly yours,

GENTRY LOCKE RAKES & MOORE, LLP

BUREAU OF AIR QUALITY

**RE: Request for Coverage under the Registration Permit for Fuel Combustion Operations**

Dear Mr. Reynolds:

You have received this correspondence because the Bureau of Air Quality (BAQ) has determined, based on available information, that your facility may qualify for coverage under the Registration Permit for Fuel Combustion Operations. The registration permit will be valid for ten years and will cover the construction and operation of sources at the site that meet the criteria for the Registration Permit for Fuel Combustion Operations.

If you wish to be covered under this Registration Permit Please sign this letter and return it to me. Please keep a copy of this letter for your files. This registration permit applies to fuel combustion operations meeting the following criteria:

1. The facility is permitted for the following sources: boilers, generators (emergency and non-emergency), storage tanks, ethylene oxide sterilizer (if located at a hospital), and sources exempt as outlined in S.C. Regulation 61-62.1, Sections II(A)(1)(b) and II(B).
2. The maximum size for a single boiler burning fuels other than natural gas and propane is limited to 30 million BTU/hr heat input capacity and the combination of all boilers on site, regardless of the fuels burned, is limited to 100 million BTU/hr heat input capacity.
3. Sources can only be fired on natural gas, propane, virgin No. 2 fuel oil, virgin diesel, Biodiesel that meets ASTM D6751 or any other Department approved fuels. The use of any non-specification oil, hazardous waste, or any other waste chemical as a fuel or any addition of these items to the fuel shall not be allowed.
4. Sulfur content of any fuel burned shall be less than or equal to 0.05% by weight.
5. The non-emergency generators are certified by the manufacturer to meet EPA's nonroad diesel engine emission standards/tiers.
6. Non-emergency generators are limited to operating no more than 500 hours per year if you wish to be exempt from modeling.
7. Facility wide potential to emit is less than any major source thresholds as defined in Title V and NSR.

I certify we meet the criteria established for the Registration Permit for Fuel Combustion Operations as outlined above and agree to the conditions and terms of the Registration Permit for Fuel Combustion Operations.

Responsible Official Signature

SAMUEL L. CANNON, JR. U.P. OPS 6-22-12  
Date

If you have any questions about the Registration Permit for Fuel Combustion Operations or need assistance with completing the application, please contact me at (803) 898-3836 or e-mail at hayesam@dhec.sc.gov.

Sincerely,

Alyson Hayes
