RE: Johnson Controls Battery Group, Inc., Source Test Extension

Dear Mr. vandenMeiracker,

On August 16, 2012 the Department received a request from you on behalf of Johnson Controls Battery Group, Inc. (JCI), requesting a source test extension on its Storage and Extrusion units listed as ID 03. This process is a State Only source and ancillary to the main production units. Testing this unit without the main production units functioning will not provide data that is useful for emissions quantification. Therefore, the Department hereby approves this extension request. JCI shall conduct the required source tests no later than January 12, 2013, which is 180-days after the startup date of the first source subject to USEPA 40 CFR 63. All source tests must be conducted in accordance with SC 61-62.1 Section IV, Source Tests. If you have any questions please contact me by telephone at 803-898-4051 or via email at shroupmd@dhec.sc.gov.

Sincerely

Michael D. Shroup
Program Manager
