

Intermedical Center of SC

Healthcare Associated Infections Report - August 1, 2009

Surgical Site Infection (SSI) Rate by Procedure and Risk Index 12/01/2008 - 05/31/2009

Procedures that are required to be reported were not performed at this hospital during the time period.

Central Line Associated Blood Stream Infection (CLABSI) Rate 12/01/2008 - 05/31/2009

Location^a	No. of Infections	No. of Central Line Days^{b,c}	Infection Rate (per 1000 Central Line Days)
Long Term Acute Care	4	3330	1.2

a. The specific patient care area in which a patient is assigned while receiving care in the healthcare facility.

b. Central line days are the total number of days a central line is in place for all patients in selected hospital locations. A central line day calculation example can be found in the [Definitions of Terms](#).

c. * = Too few central line days. Reporting on too few central line days is a risk to confidentiality and data stability. If there are less than fifty central lined days, the rate and number of infections will be suppressed until there are more central line days to report

Hospital Profile

Average Daily Census:

23

Lab Capabilities: Does this hospital's laboratory use the Clinical and Laboratory Institute (CLSI) antimicrobial susceptibility standards?

Yes

Infection Control Process

Number of Infection Control Practitioners:

1

Total hours per week performing surveillance:

12

Total hours per week for infection control activities other than surveillance:

10
