

HIV Prevention Community-Based Funding: RFA 2012 Overview

In calendar year 2012, the Centers for Disease Control and Prevention (CDC) provided a five-year HIV prevention grant to South Carolina. DHEC received this funding and developed a Request for Applications (RFA) from the CDC grant in order to fund community-based organizations (CBOs) for targeted prevention efforts throughout South Carolina. This funding represents a new direction in HIV prevention, and is designed to achieve a higher level of impact with every federal HIV prevention dollar.

CDC's and DHEC's new approach features better population-based and geographic targeting of resources and a stronger focus on supporting the highest-impact prevention strategies. This approach embodies the commitment to [high impact HIV prevention](#) using scalable, cost-effective interventions with demonstrated potential to reduce new infections to yield a major impact on the HIV epidemic. High impact prevention is essential to achieving the HIV prevention goals of [the National HIV/AIDS Strategy](#), which was announced in 2010.

The purpose of the 2012 RFA was to support implementation of high impact, comprehensive HIV prevention programs to achieve maximum impact on reducing new HIV infections. The overall goals to be accomplished are reducing the number of new HIV infections, increasing access to care, improving health outcomes for people living with HIV, and promoting health equity. This will be accomplished by increasing HIV testing, linking HIV positive persons to medical care and other essential services, and increasing program monitoring and accountability. Specifically for purposes of this RFA, funds are provided in alignment with the *NHAS* to:

- A. Focus HIV prevention efforts in communities and local areas where HIV is most heavily concentrated to achieve the greatest impact in decreasing the risks of acquiring HIV.
- B. Increase targeted HIV testing in non-healthcare settings to identify undiagnosed HIV infection, with a program minimum of at least a 1.0% rate of newly identified HIV positive tests annually.
- C. Increase access to care and improve health outcomes for people living with HIV by linking them to continuous and coordinated quality care and much needed medical, prevention and social services.
- D. Expand targeted HIV prevention efforts using a combination of effective, evidence-based approaches, including delivery of integrated and coordinated behavioral and structural HIV prevention interventions.
- E. Reduce HIV-related disparities and promote health equity.

Two funding categories were offered. For category 1 "core prevention" funding, as a result of the funding awards announced on May 8, 2012, DHEC shifted CBOs' HIV targeted testing efforts overall to the state's priority populations as follows:

- Increase targeted testing numbers from 3,800 planned in CY2011 to 4,775 in CY2012 (a 26% increase).
- Increase testing for African American men who have sex with men (AAMSM) from 4.8% planned testing in CY2011 to 12.6% in CY2012.
- Increase testing for white MSM from 11.5% in CY2011 to 12.0% in CY2012.
- Increase testing to AAMSM and other priority populations in the areas of highest incidence and prevalence.
- Total targeted testing numbers are planned to increase in each subsequent year of the funding.
- Funding allocations for targeted testing account for 58% of the overall Category 1 funding awards.
- Funding allocations for prevention with positive persons account for 22% of the overall Category 1 awards.
- Funding allocations targeted to AAMSM account for 67% of the funding for behavioral interventions to high-risk negative persons in the Category 1 awards.
- Funding allocations were awarded to programs serving the 11 counties with the greatest numbers of HIV incidence and HIV prevalence cases as of CY2009-CY2010.

Category 2 awards, totaling \$455,000, are all targeted towards prevention with positives in the framework of linkages to and retention in continuum of care programs.

**DHEC-Funded Community-Based HIV Prevention Program Models by Organization
CY2013 – Funded By CDC Grant PS12-1201**

Organization	Funded Program Models
ACCESS Network, Inc. <i>(Beaufort*, Colleton, Hampton, Jasper)</i>	HIV Counseling, Testing and Referral Services (CTRS)
Acercamiento Hispano/Hispanic Outreach <i>(Aiken, Kershaw, Lexington*, Newberry, Richland*, Saluda, Sumter*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Project RESPECT
AID Upstate, Inc. <i>(Anderson, Greenville*, Greenwood, Laurens, Oconee, Pickens, Spartanburg*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Project RESPECT Healthy Relationships WILLOW Many Men, Many Voices SISTA Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
CARETEAM, Inc. <i>(Georgetown, Horry*, Williamsburg)</i>	HIV Counseling, Testing and Referral Services (CTRS) Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
Catawba Care <i>(Chester, Lancaster, York*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Healthy Relationships Many Men, Many Voices Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
HopeHealth <i>(Bamberg, Calhoun, Darlington, Florence*, Marion, Marlboro, Orangeburg*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Healthy Relationships SISTA Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
Lowcountry AIDS Services <i>(Berkeley, Charleston*, and Dorchester)</i>	HIV Counseling, Testing and Referral Services (CTRS) Healthy Relationships WILLOW Many Men, Many Voices Mpowerment SISTA Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
PALSS <i>(Fairfield, Kershaw, Lexington*, Newberry, Richland*, Sumter*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Project RESPECT Healthy Relationships Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
SCHAC <i>(Kershaw, Lee, Lexington*, Richland*, Sumter*)</i>	HIV Counseling, Testing and Referral Services (CTRS) Healthy Relationships Many Men, Many Voices Antiretroviral Treatment and Access to Services (ARTAS) Linkages to and Retention in Care for persons living with HIV/AIDS
USC School of Medicine <i>(Midlands area*)</i>	Comprehensive Risk Counseling and Services (CRCS)

*Indicates counties that are among the top 11 in South Carolina for the number of recent (in CY 2009 – CY 2010), newly-identified HIV infections and the number of persons living with HIV/AIDS

**DHEC Health Department-Based HIV Prevention Program Models By Region
CY2013 – Funded By CDC Grant PS12-1201**

DHEC Region w/Counties	Funded Program Models
<p>Upstate: <i>Abbeville, Anderson, Cherokee, Greenville, Greenwood, Laurens, McCormick, Oconee, Pickens, Spartanburg, Union</i></p>	<p>HIV Counseling, Testing and Referral Services (CTRS) Partner Services (PS) Antiretroviral Treatment and Access to Services (ARTAS) Comprehensive Risk Counseling and Services (CRCS) Project RESPECT</p>
<p>Midlands: <i>Aiken, Barnwell, Chester, Edgefield, Fairfield, Kershaw, Lancaster, Lexington, Newberry, Richland, Saluda, York</i></p>	<p>HIV Counseling, Testing and Referral Services (CTRS) Partner Services (PS) Antiretroviral Treatment and Access to Services (ARTAS) Comprehensive Risk Counseling and Services (CRCS) Project RESPECT</p>
<p>Pee Dee: <i>Chesterfield, Clarendon, Darlington, Dillon, Florence, Georgetown, Horry, Lee, Marion, Marlboro, Sumter, Williamsburg</i></p>	<p>HIV Counseling, Testing and Referral Services (CTRS) Partner Services (PS) Antiretroviral Treatment and Access to Services (ARTAS) Comprehensive Risk Counseling and Services (CRCS) Project RESPECT</p>
<p>Low Country: <i>Allendale, Bamberg, Beaufort, Berkeley, Calhoun, Charleston, Colleton, Dorchester, Hampton, Jasper, Orangeburg</i></p>	<p>HIV Counseling, Testing and Referral Services (CTRS) Partner Services (PS) Antiretroviral Treatment and Access to Services (ARTAS) Comprehensive Risk Counseling and Services (CRCS) Project RESPECT</p>
