

Diabetes In Pickens County, 2012

Produced by the South Carolina Department of Health and Environmental Control

Impact of Diabetes in the United States

- Diabetes affects 25.8 million Americans and contributes to approximately 231,000 deaths a year.
- Diabetes is becoming more common in the United States. From 1980 through 2011, the number of Americans with diagnosed diabetes has more than tripled (from 5.6 million to 20.9 million).
- The direct and indirect costs of diabetes in the U.S. were nearly \$174 billion in 2008.
- 69,701 people died of diabetes in the U.S. in 2010.

Diabetes in South Carolina

- Approximately 421,549 adults in South Carolina are diagnosed with diabetes. African Americans have a 42% higher prevalence than Whites.
- The total direct costs of hospitalizations and emergency room visits were over \$4.7 billion in 2012.
- Diabetes is the seventh leading cause of death in South Carolina, claiming 1,186 lives in 2012.

Behavioral Risk Factors

- Major behavioral risk factors, such as obesity and physical inactivity are partially responsible for development of type 2 diabetes (Fig 1).

Diabetes Prevalence

- An estimated 11.1% of adults in Region 5 suffer annually from diabetes (Fig 2).

*County-level BRFSS not available for 2012.

Hospital and Emergency Room Discharges

- In 2012, there were 196 hospitalizations for diabetes in Pickens County for all ages.
- There were an additional 2526 hospital discharges with diabetes-related conditions in Pickens County.
- In 2012, there were 307 emergency room (ER) visits for diabetes as the primary diagnosis, among which 44 (14%) were by African-American patients.
- There were 5874 ER visits for diabetes as a related condition.

- Medicare paid for 51% of the ER and Hospitalization charges in Pickens County (Fig 3).

Complications

- 43% of patients hospitalized in SC for diabetes had complications in 2012; 37% of hospitalizations in Pickens County (Table 1).
- In 2011, more than 74% of people in SC with diabetes had hypertension, compared with only 30% of people without diabetes.

Diabetes Complication	Hospital Admissions	Percent of Diabetes Hospital Admissions	Total Charges
Renal Failure	784	29%	\$31,470,400
Lower Extremity Amputation	36	1%	\$2,402,700
Ketoacidosis	112	4%	\$3,691,000
Retinopathy	60	2%	\$2,258,900

- In 2011, more than 67% of people with diabetes had high cholesterol.
- 2012, the rates for lower extremity amputations among blacks in SC were 3times the rates among whites.

Mortality

- Diabetes is the seventh leading cause of death in Pickens County.
- A total of 29 people in Pickens County died from diabetes in 2012.

- The Pickens County mortality rate was 22.1/100,000 in 2012, below the state average.
- Pickens County ranks #33 in diabetes mortality in South Carolina 2010-2012.
