

Diabetes in Williamsburg County, 2012

Produced by the South Carolina Department of Health and Environmental Control

Impact of Diabetes in the United States

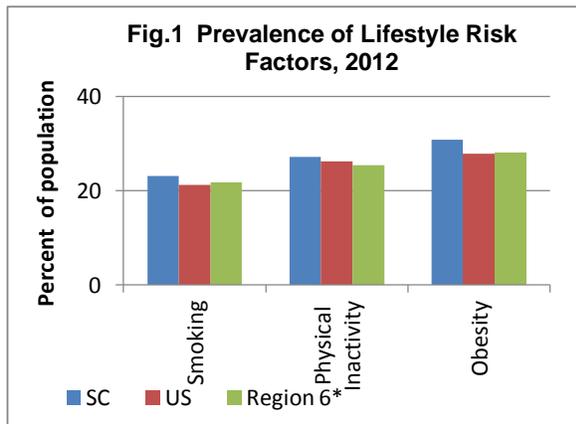

- Diabetes affects 25.8 million Americans and contributes to approximately 231,000 deaths a year.
- Diabetes is becoming more common in the United States. From 1980 through 2011, the number of Americans with diagnosed diabetes has more than tripled (from 5.6 million to 20.9 million).
- The direct and indirect costs of diabetes in the U.S. were nearly \$174 billion in 2008.
- 69,701 people died of diabetes in the U.S. in 2010.

Diabetes in South Carolina

- Approximately 421,549 adults in South Carolina are diagnosed with diabetes. African Americans have a 42% higher prevalence than Whites.
- The total direct costs of hospitalizations and emergency room visits were over \$4.7 billion in 2012.
- Diabetes is the seventh leading cause of death in South Carolina, claiming 1,186 lives in 2012.

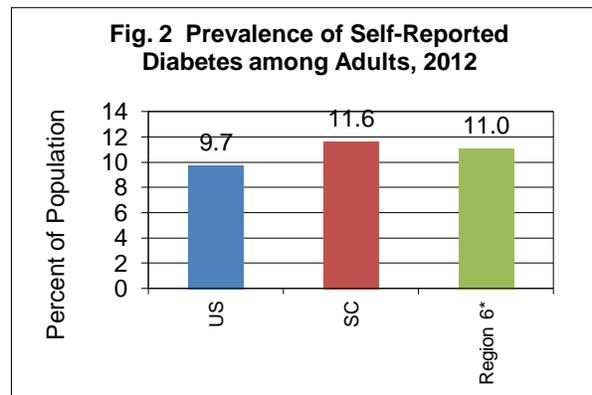

Behavioral Risk Factors

- Major behavioral risk factors, such as obesity and physical inactivity are partially responsible for development of type 2 diabetes (Fig 1).

Diabetes Prevalence

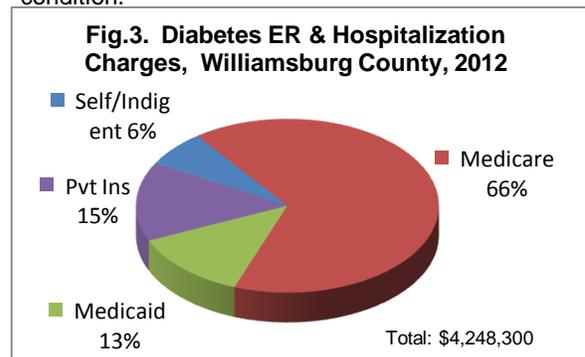

- An estimated 11% of adults in Region 6 suffer annually from diabetes (Fig 2).

*Countylevel BRFSS not available for 2012.

Hospital and Emergency Room Discharges

- In 2012, there were 126 hospitalizations for diabetes in Williamsburg County for all ages.
- There were an additional 1039 hospital discharges with diabetes-related conditions in Williamsburg County.
- In 2012, there were 196 emergency room (ER) visits for diabetes as the primary diagnosis, among which 170 (87%) were by African American patients.
- There were 1197 ER visits for diabetes as a related condition.

- Medicare paid for 66% of the ER and Hospitalization charges in Williamsburg County (Fig 3).

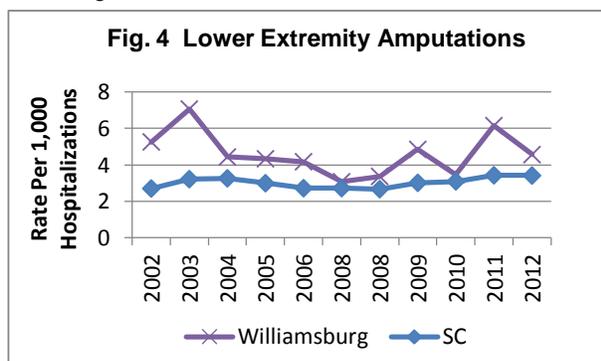

Complications

- 43% of patients hospitalized in SC for diabetes had complications in 2012; 51% of hospitalizations in Williamsburg County (Table 1).
- In 2011, more than 74% of people in SC with diabetes had hypertension, compared with only 30% of people without diabetes.

Table 1. Hospitalizations for diabetes Complications in Williamsburg County in 2012

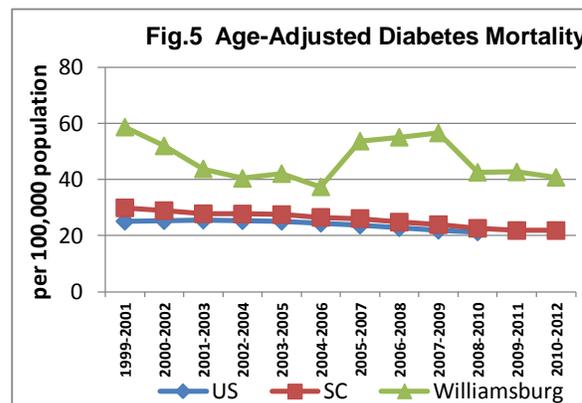

Diabetes Complication	Hospital Admissions	Percent of diabetes Hospital Admissions	Total Charges
Renal Failure	466	41%	\$17,755,800
Lower Extremity Amputation	21	2%	\$1,677,700
Ketoacidosis	38	3%	\$920,200
Retinopathy	56	5%	\$2,689,900

- In 2011, more than 67% of people with diabetes had high cholesterol.
- 2012, the rates for lower extremity amputations among blacks in SC were 3 times the rates among whites.

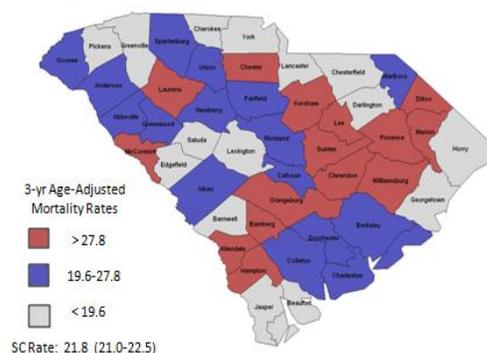

Mortality

- Diabetes is the sixth leading cause of death in Williamsburg County.
- A total of 16 people in Williamsburg County died from diabetes in 2012.

- The Williamsburg County mortality rate was 37/100,000 in 2012, above the state average.
- Williamsburg County ranks #5 in diabetes mortality in South Carolina 2010-2012.
