

## **AMENDMENT FOR 208 CONFORMANCE**

---

### **Town of St. Matthews Wastewater Treatment Plant PER New Land Application Disposal Site Calhoun County**

---

It has been determined that this request requires a minor amendment to the *208 Water Quality Management Plan Update for the Non-designated Area of South Carolina*. A minor amendment is needed for:

- ❑ An existing wastewater treatment facility that proposes to increase discharge volume by less than 50% and less than 10MGD
- ❑ Conversion of existing wastewater treatment facilities to other basins such as equalization or storage basins
- ✓ Any other proposal SCDHEC considers minor with regard to water quality effects or stakeholder interest

The Town of St. Matthews has submitted a Preliminary Engineering Report proposing to discharge treated domestic wastewater on two adjacent sites southeast of the Town of St. Matthews. Contingent upon the acquisition of these properties, the Town's NPDES permit (SC0028801) will be replaced by a land application permit (ND0086983). The discharge volume will not change.

The PER is in conformance with section IV.B. Elimination of Discharges and Consolidation of Facilities of the 208 Plan and the guidelines set forth in the Antidegradation Implementation for Water Quality Protection in South Carolina.

This change is noted and hereby incorporated into the Plan.

**Amendment Date:** 3/21/12

**Water Quality Planning Coordinator:** Anne McGovern
