RE: Public Notice #14-008-TV-RE January 28, 2014

I strongly request that a permit be approved for no longer than 5 years and that after the F35 jet squadrons are in place and training that another study of the air quality and environmental impact be conducted.

I would hope that all permits may be repealed if circumstances warrant however this is most likely a very difficult process. Being cautious from the beginning gives us a needed sense of confidence in maintaining a healthy community of people, animals and marine life.

Thank you for your consideration,
Sandra Stephan
