Managing Your Asthma

For people with asthma, understanding asthma management and treatment options will help you take control of your asthma.

Steps to help keep your asthma under control:
1. Make your medical visits more productive.
2. Create an asthma management plan.
3. Assess and monitor your control.
4. Understand your medication.
5. Reduce asthma triggers.
6. Learn asthma self-management skills.

Asthma Triggers
The most common asthma triggers include:
- Allergies
- Genetics
- Environment
- Respiratory Infection
- Tobacco Smoke
- Dust Mites
- Outdoor Air Pollution
- Cockroaches
- Pets

What Causes Asthma?
No one knows exactly what causes asthma. Asthma tends to run in families and may be inherited, and environmental factors may also play a key role. Scientists continue to explore what causes asthma, but we do know that these factors play an important role in the development of asthma.

Asthma in South Carolina

• In adults, 9.2% currently have asthma.5
  More females (11.9%) than males (6.3%) currently have asthma, and more residents with less than high school graduation (13.1%) than college graduates (7.2%) currently have asthma.

• 69 South Carolinians died from asthma in 2017.6

• In 2017, 12.3% of South Carolina high school students reported currently having asthma.7

Asthma in the U.S.
Asthma is a chronic disease that affects your lungs. It causes repeated episodes of wheezing, breathlessness, chest tightness, and nighttime or early morning coughing. Asthma cannot be cured, but it can be controlled and managed with adequate access to medical care, medications, trigger avoidance, and self-management.

Uncontrolled Asthma is a Common Reason People Seek Medical Attention

In 2017, there were 21,924 emergency department (ED) visits and 2,485 hospitalizations for asthma. The rate of ED visits and hospitalizations were higher for females than males and five times higher for black residents than white residents.

In 2017, ED charges for asthma were more than $67 million and hospitalization charges were more than $55 million.

Asthma Among Children

Children suffer the most from asthma in South Carolina.

- Asthma was the leading cause of children’s hospitalizations in fiscal year 2017, followed by acute bronchiolitis.
- In 2017, among those 17 and under, there were 8,160 ED visits and 941 hospitalizations for asthma.
- ED charges were more than $19 million for asthma among children and hospitalization charges were more than $12 million in 2017.
- The counties along the I-95 corridor had the highest rates of hospitalizations and ED visits among children in 2017.

Asthma Hospitalizations and Emergency Department Visits Among Children 0-17

Rate per 10,000

- 91 - 68.2
- 68.3 - 95.6
- 95.7 - 123.8
- 123.9 - 240.0

Asthma Hospitalizations and Emergency Department Visits Among Children, by Month of Admission

In South Carolina, asthma hospital admissions follow seasonal patterns. More children are hospitalized for asthma in the spring and fall, and fewer are hospitalized in the summer. A major contributor to the fall increase in asthma hospitalizations is thought to be increasing rates of respiratory infections associated with children going back to school. Other possible contributing factors include pollen and mold.

ED visits and hospitalizations due to asthma were highest in younger age groups. Those less than 10 years of age had ED visits four times higher than those 55 years and older.
