RE: Former G-E Ceramic Site  
Laurens County

Dear Mr. Baxter:

In a March 10, 1989 telephone conversation with Greg Roush of Law Environmental Services, he proposed the sampling plan for the lagoons at the above referenced site to include analyzing two samples from each lagoon: one at the inlet and one at the outlet. Each sample would be composited from samples at varying depth.

From conversations with Harold Seabrook of our Waste Assessment Section, we request that you analyze four samples from each lagoon: one from each quadrant. Each sample should be composited of three samples from the top, middle, and bottom portions of the sludge layer.

If you have any questions, please call me at 803-734-5200.

Sincerely,

*G. Randall Thompson*
