Construction Season (May 1 – Oct 31) – Updated Monthly

May 1 – May 31	13 days WSE above cofferdam height (10.27) 9 days WSE above safe working height (7.0) for cofferdam construction 22 days of no work in the river due to high water in May 2020
June 1 – June 30	0 days WSE above cofferdam height (10.27) 6 days WSE above safe working height (7.0) for cofferdam construction 6 days of no work in the river due to high water in June 2020
July 1 – July 31	0 days WSE above cofferdam height (10.27)

1 day WSE above safe working height (7.0)*

1 day of no work in the river due to high water in July 2020

August 1 – August 31 0 days WSE above cofferdam height (10.27) 5 days WSE above safe working height (7.0)*

5 days of no work in the river due to high water in August 2020

WSE – Water Surface Elevation at nearby Congaree River Gage Location

* For the purpose of this exercise (i.e. tracking the "no work in the river" days), it has been assumed that by July 1st of 2020 - construction of the cofferdam will likely have been completed. River gage heights above 7 feet are considered "no work in the river" days because work would have to stop to prepare the working face to withstand an overtopping event.
